

# FLOATING BOAT

## Source of Design

Southeast Asia has suffered long-term flooding. Flooding is often delayed for a long time, affecting crop yields and residents' lives.

## The statistics of Southeast Asia's flood

## Concept

After observing the local buoyancy carrier, we designed a combined floating apartment. Use local building materials "bamboo". Combines natural ventilation design confrontate the hot tropical areas. The main axis of design for symbiosis with hydroponic fish and vegetables solves the problem of food shortage during floods.
