International College of
Sustainability Innovations

Three fully English-taught Master Programs in the International College of Sustainability Innovations of National Taipei University, Taiwan Now Open for Application

We welcome international students who are interested in pursuing higher education in Taiwan to submit application via <http://english.ntpu.edu.tw/files/11-1003-336.php>.

Taiwan, with its advantages of quality higher education, affordable tuition, diverse culture, friendly people, and good living environment, is among the best places to study abroad for people from other countries. Began as Taiwan Provincial College of Public Administration in 1949, National Taipei University (NTPU) has a long tradition of educating and training social science elite, especially in law and business.

About International College of Sustainability Innovations

The International College of Sustainability Innovations (ICSI) of NTPU was found in August 2019. It is the only college in NTPU designed specifically for recruiting international students. ICSI aims to improve the competitiveness of NTPU by providing an environment that makes it easier for international students to study in Taiwan and receive a high quality education. Blending globally aligned program with locally friendly ambience, ICSI offers a broad spectrum of unique experience and challenges for international students.

As depicted in its title, ICSI's goal is to blend sustainability and innovation. We intend to incorporate environmental, social and economic sustainability into our core design strategy. By creating and offering courses related to sustainability, developing and implementing a collaborative inter-discipline and cross-discipline teaching model and research, ICSI's multi-cultural experiences will prove vital to student's future career.

Currently, ICSI is made up of three graduate master programs: Master Program of Business Administration (MBA) in Finance, International Program on Urban Governance (IPUG) and Smart Healthcare Management. All the courses offered in these degree programs are fully English taught and provide our matriculated program students various types of financial supports includes full scholarships, partial scholarships, tuition waivers, and assistantships.

ICSI looks for international students who aspire to share their learning experience and interact with Taiwanese local students and students from other countries. Students can enter the programs either in the fall or spring semester. Online application for the fall semester starts from February to April 30th, and spring semester, from September to October 31st.

Master Program of Business Administration in Finance

With the support from NTPU's College of Business, MBA in Finance was founded in 2013, aiming to become the incubation center of future financial leaders and equip them with global views and Asian perspectives. The program, together with the College of Business, obtained international accreditation from the Association to Advance Collegiate Schools of Business (AACSB) in 2016. MBA in Finance is the first MBA program specializing in Finance. But for students who may be interested in management more, we provide two study tracks: management and finance. We also offer intern opportunities in financial institutions for students.

International Program on Urban Governance

The mission of the International Program on Urban Governance (hereinafter as IPUG) is to enhance the understanding of how cities work and what city managers should do to cope with the unprecedented urban challenges. Yet the IPUG is different from traditional urban planning programs. We focus on the governance aspect more, while the traditional urban planning programs emphasize planning more. Currently, our program provides courses in 4 tracks: smart city and urban governance, big data analytics, sustainability management, and real estate management. Our curriculum is designed to provide insights into urban governance from global perspectives, while retaining their relevance to the current research and innovations in western countries. Career opportunities for our graduates include city managers, landscape architects, researchers, data analysts, assets Manager, etc. Several forms of financial aid are available for qualified students.

Master Program in Smart Healthcare Management

The Master Program in Smart Healthcare Management (hereinafter as SHM) is a new program at International College of Sustainability Innovations. The program focuses on cross-field research and teaching, combining information technology, healthcare, and management to create a digitized healthcare system and to connect available medical resources and healthcare services. At SHM, we deliver a Master of Health Administration (MHA) degree that thoroughly prepares students for the dynamic world of healthcare technology. Our comprehensive, flexible, and cutting-edge curriculum is taught by faculty experts in specialized fields and professionals from healthcare industry.
